### Configuration

The **zSignalTrans**® IST-D transmitter is user configurable with the **zSignalwin**® software and interface cable URC-1020 or handheld programmer. The **zSignalwin**® is user-friendly software. The latest release version can be download free from website. Interface cable consist of interface converter and USB plug. It can be purchased separately from the **zSignalTrans**® supplier. During configuration the transmitter can work alone without connecting to a power source.
